Ms. Butler reported to the U.S. Probation Office on November 7, 2016, as she was directed to report weekly due to providing prior positive UA tests. This sample tested positive for THC and was sent to Alere Laboratories for confirmation and testing. Results were received on November 10, 2016, confirming this sample was positive for the presence of THC.

Ms. Butler provided a UA sample on November 14, 2016, which tested positive for THC and was sent to Alere Laboratories for confirmation and testing. Results were received on November 17, 2016, confirming this sample was positive for the presence of THC.

On November 21, 2016, Ms. Butler reported and provided a UA that tested presumptively positive for THC. The UA sample was sent to Alere Laboratories for confirmation and testing. Results were received on November 25, 2016, confirming this sample was positive for THC.

The undersigned officer contacted Alere Laboratories on December 1, 2016, and requested an interpretation of the UA results, specifically for levels of THC use during the time period of October 4, 2016, through November 28, 2016.

Alere Laboratories responded on December 5, 2016. The report was written and interpreted by Alere's Director of Toxicology. In his opinion, and based on the THC levels, Ms. Butler reused marijuana before October 24, 2016; and November 14, 2016. The results from the UA tests submitted on October 31, 2016; November 7, 2016; and November 21, 2016, were inconclusive, and Alere was unable to determine if this was new use or residual elimination.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on: 12/07/2016
